

## OPENLAND TOURNIQUETTE POUCH

### OPT-00961

This rigid tourniquet case is designed to provide quick and easy access to your tourniquet in emergency situations. Made of injection-molded nylon, the case is durable and abrasion-resistant, ensuring long-lasting protection for the contents.

It can be mounted on belts or MOLLE platforms, offering compatibility with a wide range of gear. The design without external covers ensures that the tourniquet stays securely in place thanks to friction, eliminating any delays in extraction during use.

The case can be mounted both vertically and horizontally, allowing for personalized installation based on your preferences or operational needs. Additionally, it features an identifiable patch with a red cross for easy identification in emergencies.

#### Features:

- **Easy and quick access:** the coverless design ensures rapid extraction of the tourniquet.
- **Durability and resistance:** made of injection-molded nylon to withstand heavy use and abrasions.
- **MOLLE compatible:** can be worn on belts or MOLLE platforms for easy integration with your gear.
- **Vertical or horizontal mounting:** the ability to mount the case in various positions for customizable use.
- **Identifying patch:** the red cross on the front makes the case easily identifiable.
