

LAL3

WORKBOOK 2020

OUR STORY

LALO produces and sells technologically advanced footwear designed and developed in conjunction with US Special Forces Operators, Tactical Athletes and First Responders.

Relying on years of formal testing and evaluation with Elite Special Forces Units, **LALO** specifically produces best-in-class tactical and athletic footwear lines that are disruptive in their unique features.

LALO exists to elevate the standard against which all other tactical and athletic brands are measured - in product design, content, authenticity, customer service and social stewardship.

We use top tier materials to create some of the best and hardest working tactical boots and athletic footwear for those that rise to the toughest occasions.

We honor those who choose a path of purpose, a path of hard work, grit and determination. Every piece of gear we create is for the end user who refuses to settle for the status quo.

Whether your path leads you to a career in the military, competing in an adventure race, cross training, tackling an urban athletic workout, or running a 5K, we invite you to experience **LALO**.

A military-style utility vehicle, possibly a Land Rover Defender, is shown in a desert environment. Three soldiers in full combat gear are on board. One soldier is in the driver's seat, another is standing in the middle of the vehicle holding a rifle, and a third is standing at the back. The vehicle is tan-colored and has a spare tire mounted on the back. The background shows a vast, flat desert landscape with mountains in the distance under a clear sky.

LAND

For those who serve.
For those who protect.
For the warrior.
For the tip of the spear.

FEATURES AND TECHNOLOGY

Amphibian Outsole - Features a quiet, blown rubber outsole made with a DuPont™ compound proprietary to LALO and provides traction in warm environments, is seawater resistant, and is durable yet lightweight.

Intruder Outsole - Featuring a deeper tread depth for traction in all environments, the rubber outsole of the Intruder has a DuPont™ compound proprietary to LALO, and while slightly heavier than the Amphibian, features the utmost in durability while remaining lightweight. Provides abrasion resistance along with adhesion to wet, slippery surfaces.

Jungle / 670-1 / Athletic Outsole - A modern update on a classic outsole. This outsole uses our proprietary rubber compound that is lightweight, durable and offers exceptional grip.

LALO Outsole Technology - Replicates the natural shape of the heel and enables the user to go from outer heel (foot strike) to big toe ball joint (toe off), promoting an efficient rolling motion in the gait cycle. The EVA and Outsole/Midsole integration allows for a cushioned and then propulsive interaction with the foot and makes for a quiet, stealth approach.

Bifit Board - Every LALO boot features a puncture resistant footboard engineered to create rocker and toe spring to make the Operator 35% more efficient depending on ruck load. The LALO Bifit board is made from 70% recycled polypropylene with a composite additive.

Ramp Angle - Active 8mm drop from heel height to forefoot height to promote optimal heel height to toe height drop.

Drainage - Passive drainage system to allow water to flow in, yet more importantly out which helps to control moisture management and slow potential skin breakdown.

LALO FOOTWEAR IS CONSTRUCTED WITH AN INSIDE-OUT APPROACH TO "FOOTGEAR", BUILT ON THE PRINCIPLES OF LAYERING.

Trek-Dry Lining - Moisture-wicking, antimicrobial, hydrophobic, quick-dry ceramic bamboo lining.

Dual Density Athletic Sole - Two different densities of EVA foam in the midsole results in a protective frame and sensitive footboard for impeccable feel and ground contact.

Fin Clip - Designed to grab the heel strap of a swim fin and eliminate strap movement while swimming.

KPU Grill - Keeps debris out while allowing air exchange to help prevent skin breakdown.

Carbonized Rubber Toe Cap - Abrasion resistant toe cap for longer wear and improves the adhesion of upper to bottom unit. Lightweight and promotes high speed, low drag performance properties.

KPU Lacing System - Laces are held by friction to allow the boot to function even if a lace breaks at an inopportune time. Once laced, the boots stay secure over a long period of time. A hidden lace pocket stores the laces.

Rockered Outsole Shape - A rounded heel shape enables the user to go from outer heel (foot strike) to big toe ball joint (toe off), promoting an efficient rolling motion in the gait cycle. This rolling motion promotes "good form" when walking and running, having the midfoot land under the hip at footstrike.

Hot Weather - Excels in warm weather environments to allow for as much air circulation as possible and increase all day comfort.

Cold Weather - Excels in cold weather environments up to -40° Fahrenheit while remaining breathable and comfortable.

5" SHADOW AMPHIBIAN

COLORWAYS

 **Black Ops**
1ML001 BKO

 **Coyote**
1ML001 COY

 **Ranger Green**
1ML001 RGN

FEATURES

The Ultimate Special Forces Tactical Boot. The Shadow Amphibian is for use while in the air, on land and in the water. The passive drainage system is not designed to keep the water out, but to let it flow in and out of the boot as needed. Used for amphibious operations, where the user is working in or around water, or exiting a wet environment on to land. The Amphibian is a go-to boot for those who require quick dry components, drainage, comfort and innovative technology all built into one. Available in Black Ops, Coyote Brown and Ranger Green; 5" cuff.

FEATURES

 **FEATURES
& BENEFITS
INFOGRAPHIC**

The Bloodbird X offers superior stability through the mid-foot and shines in workouts with less dynamic movements such as weight training, where the focus is on grounding and stability. Features an adaptively engineered knit upper that forms to the foot and provides a next to skin fit and feel. With dual zone EVA foam in the midsole (50 rearfoot 55 forefoot), the Bloodbird X is a solid choice for movements requiring attention to balance such as squats, deadlifts, push press, cleans and jerks. Available in Black Ops, Jungle and Battleship Grey.

GRINDER X

PRODUCT FEATURES VIDEO

COLORWAYS

 **Black Ops**
1BU202 BKO
1BU102 MBK (Maximus)

 **Jungle**
1BU202 JNG

FEATURES

The Grinder X is a mid-foot mobility shoe that shines in a variety of cross-training activities. With dual zone EVA foam in the midsole (50 rearfoot 55 forefoot), the Grinder X was engineered for dynamic, bodyweight-based agility drills and movements. Features an adaptively engineered knit upper that forms to the foot and provides a next to skin fit and feel. It features a softer, grippier, feel for multi-directional movements such as jump rope, burpees, box jumps, jumping, lunges, and more. It is a practical shoe for rowing, short distance runs and sprints. Available in Black Ops and Jungle.

 **FEATURES & BENEFITS INFOGRAPHIC**

ZODIAC RECON

COLORWAYS

 **Black Ops**
1BU005 BKO

The Zodiac Recon is a nimble and quick running shoe across a variety of substrates, suitable for both long and short distance runs. The rocker shape of the Zodiac Recon's sole promotes forefoot strike and forward momentum. Reinvented through lightweight component construction and responsive geometry, it provides the ultimate smooth, yet responsive ride for multi-grade terrain. Available in Black Ops.

Jungle

1BU105 JNG

LALO Cam

1BU105 DES

The Zodiac Recon AT is a mid-sized, rugged running shoe with lightweight component construction and responsive geometry. It provides a quick and responsive ride for off road terrain. The Zodiac Recon AT is suitable for both long and short distance runs, but excels on trails, mixed substrates and roads. Due to the construction of the outsole, this is not a shoe for the treadmill. The rocker shape of the Zodiac Recon AT's sole promotes forefoot strike and forward momentum. Available in Black Ops, Jungle and Desert Camo.

1BU084 BKO

The LALO Strand features all the performance components of the Zodiac Recon AT but with a more relaxed feel through the upper. The easy entry and exit of the LALO Strand make it a formidable shoe for triathletes as well as the ultimate after-action shoe. Available in Black on White.

FEATURES

CHINA BEACH PRO MODEL

COLORWAYS

Sun

1BU085 SUN

Operator lifestyle with a story...
The LALO China Beach Pro Model Flip Flop was inspired by an actual LALO customer and Veteran who was a Naval Special Warfare (NSW) Operator and one of the founders of the China Beach Surf Club on China Beach in Danang, Vietnam.

The top sheet photoprint artwork is inspired by a photo of him taken on New Year's Eve, 1969. With a contrast white LALO logo on black straps, this flop will become your favorite all around beach, shower and travel shoe. Throw it on and go!
